

**AMENDMENTS TO THE CLAIMS**

1. (Currently Amended) A method for selecting fashion information for an individual, ~~said method~~ comprising the steps of:

providing a style database including complimentary fashion information having cosmetic data and physical characteristic data;

providing a personal characteristic database being adapted to receive physical characteristic data for at least one individual;

communicating physical characteristic data for at least two physical characteristics for ~~at least one~~ an individual from an input device to said personal characteristic database;

comparing said physical characteristic data for said ~~at least one~~ individual with said style database to identify a selection of cosmetics that are appropriate for said individual based upon the at least two physical characteristics communicated to the personal characteristic database ~~said individual's physical characteristics~~; and

identifying for said individual a selection of cosmetics that are appropriate for the individual based upon the at least two physical characteristics communicated to the personal characteristic database ~~the individual's physical characteristics~~.

2. (Original) The method of claim 1, wherein said style database further comprises instructional data concerning the proper application of cosmetics.

3. (Original) The method of claim 2, wherein said instructional data comprises a multimedia presentation.

4. (Currently Amended) The method of claim ~~2~~ 3, wherein said multimedia presentation comprises a video presentation.

5. (Original) The method of claim 1, wherein said cosmetic data comprises at least one cosmetic characteristic selected from a group consisting of: cosmetic brand, cosmetic style, colors, textures, medicinal qualities or chemical qualities.

6. (Currently Amended) The method of claim 1, wherein said ~~physical characteristic data comprises at least one physical characteristic~~ at least two physical characteristics are selected from a group consisting of: skin color, skin tone, hair color, eye color, facial shape, body proportions, body measurements.

7. (Original) The method of claim 1, wherein said input device comprises a digital camera.

8. (Original) The method of claim 1, wherein said input device comprises and colorimeter.

9. (Original) The method of claim 1, wherein said input device comprises spectrophotometer.

10. (Original) The method of claim 1, wherein said input device comprises a computer.

11. (Original) The method of claim 1, wherein said style database further comprises footwear information.

12. (Original) The method of claim 1, wherein said style database further comprises clothing information.

13. (Currently Amended) The method of claim 12, wherein said clothing information includes ~~at least one~~ clothing data selected from a group consisting of: size data, style data, fabric color data and fabric texture data.

14. (Currently Amended) The method of claim 1, wherein said personal characteristic ~~databases~~ database is accessible via a computer network.

15. (Currently Amended) A method for selecting fashion information for an individual, ~~said method~~ comprising the steps of:

providing a style database including complimentary fashion information, said complimentary ~~cosmetic~~ fashion information having cosmetic product data and physical characteristic data;

receiving from an input device physical characteristic data for at least two physical characteristics for ~~at least one~~ an individual;

comparing said physical characteristic data for said ~~at least one~~ individual with said complimentary fashion information to identify a selection of cosmetics that are appropriate for said individual based upon the received at least two physical characteristics ~~said individual's physical characteristics~~; and

identifying for said individual cosmetics that are appropriate for the individual based upon the received at least two physical characteristics ~~said individual's physical characteristics~~.

16. (Currently Amended) A method for providing fashion information for an individual, said method comprising the steps of:

providing a style database having complimentary fashion information;

providing a personal characteristic database being adapted to receive physical characteristic data for ~~at least one~~ an individual;

communicating physical characteristic data for at least two physical characteristics for ~~at least one~~ an individual from an input device to said personal characteristic database;

comparing said physical characteristic data for ~~said at least one~~ the individual with said style database to identify appropriate ~~cosmetic or clothing~~ fashion selections for ~~said the~~ individual based upon the at least two physical characteristics communicated to the personal characteristic database ~~said individual's physical characteristics~~; and

identifying ~~for said individual cosmetic or clothing~~ fashion selections that are appropriate for the individual based upon the at least two physical characteristics communicated to the personal characteristic database ~~the individual's physical characteristics~~.

17. (New) The method of claim 16, wherein the at least two physical characteristics are selected from a group consisting of: skin color, skin tone, hair color, eye color, facial shape, body proportions, body measurements.

18. (New) The method of claim 16, wherein the complimentary fashion information comprises clothing information.

19. (New) The method of claim 18, wherein the clothing information is selected from a group consisting of: clothing size, clothing style, clothing fabric color and clothing fabric texture.

20. (New) The method of claim 16, wherein the complimentary fashion information comprises cosmetic data.

21. (New) The method of claim 19, wherein the complimentary fashion information comprises footwear information.

22. (New) The method of claim 19, wherein said fashion selections are selected from the group consisting of: cosmetic information, clothing information and footwear information.

23. (New) The method of claim 16, wherein said input device comprises a camera.

24. (New) The method of claim 16, wherein said input device comprises and colorimeter.

25. (New) The method of claim 16, wherein said input device comprises spectrophotometer.

26. (New) The method of claim 16, wherein said input device comprises a computer.
